

Section 2. Exploring a Local Park

Get in touch with trees in your local park, and use these family activities to take a closer look.

Connecting Kids to Nature

Tree-tective Trouble Guide

Broken branches attached

Broken branches on ground

Problems with staking
Stakes bent, wires loose,
tree not secured

Insect feeding
Many leaves missing or
full of holes

Trunk damaged
Hit by car or lawn mower

Dead tree

Rotten spots

Split trunk

Nature is a great teacher! Try this activity - it's safe, fun, and educational. Use Project Learning Tree® (PLT) activities to get children outside and teach them about what the environment needs to remain healthy and sustainable.

Trees in Trouble

Become “tree-tectives” (tree detectives) by first examining neighborhood trees for signs of poor health and then investigating actions to help trees in trouble.

When a person is ill, we look for symptoms to help identify what is wrong. Help children brainstorm causes, symptoms, and cures for their past ailments, or perhaps those of a family member. Together, explore:

- What caused the illness and what were its symptoms?
- How did the person get better? What was the cure?
- Could this illness be prevented in the future? If so, how?

Now, work with children to compare elements that keep humans healthy with those that keep trees healthy. For example, trees require some of the same things people need to grow and thrive. They need plenty of water, nutrients, room to grow, and a stress-free environment. When a tree is stressed, it exhibits symptoms that can help determine the problem.

Protecting Trees and Forests

- Investigate the similarities and differences between an unhealthy tree and healthy trees nearby
- Adopt an unhealthy tree as a community project
- Revisit an unhealthy tree over time to document any change or decay
- Invite a tree expert from a garden center or forestry department to help

Plan a walk down a tree-lined city sidewalk, in a park, or in the woods, paying particular attention to trees and their symptoms along the way. Children can use the images on this page to identify some signs of unhealthy trees. They should take notes and make sketches of their findings to try and identify what caused the damage.

Make Learning Fun!

Encourage your child's school to incorporate environmental education and learning outdoors. For more activity ideas and resources:

- Contact your PLT Coordinator,
